FINANCIAL. Among moneyed men and institutions th the frequent bankruptcies; the uncertainty as to what congress may determine upon in financial affairs is another element causing hesitation. Money is in pretty good demand, and is becoming more plentiful with the banks, as cotton is sold and shipped off; the same process increases the supply of exchange. At the banks money quotes 8@10 per cent. per annum; exchange quotes sello per cent. per annum; exchange quoted on New York and the east ¾ discount buying; New England sight, with three days grace, ¼ discount; New Orleans, ¼ discount; selling on all points at par. Business in our banks has been dull since Monday, and was especially a selling of a deficient of a defi cially so yesterday; the complaint of a difficulty in making collections in the country, such as was not met with last year, are continued, and cause some anxiety. The air is not clear of unpleasant rumors and statements, and the daily accounts of bankrupties in all directions has an unhappy influ-nce. The St. Louis Republican, of Thurs-ay, said: "The lull in business which the anks were disposed to accept with compla-ency as a matter of course for ten days or so, a becoming so much of a lull that it will be hard to continue to view it with complacency much longer." The St. Louis Globe-Demo crat says: "In securities the principal trans-fers were of United States four per cent. The demand for these was very active. Everybody seems to be buying these bonds." Our banks received coupons or bonds that have been called in; we publish a list in another place which will save hold-ers from a loss in retaining those bonds. The New York banks are considering plans for loan contracts payable only in gold. The New York Public says: "Chicago tried to borrow \$1,000,000 here last week, and was everythere refused except upon condition that a rold. Another western city tried to borrow 1,500,000, but found no lenders of a cur-ency which the west is trying to make less valuable. Many smaller loans were refused in the same way; and several important in stitutions announced their determination to make loans only on a gold basis in future. The gap between the gold basis, upon which the world does business, and the basis upon which domestic transactions are now mainly conducted, is less than 3 per cent. If the banks could rewrite all their accounts at once, there could be no real difficulty in turning all only the gold basis in future transactions. Their power is indisputable as to all future business. The key of the whole situation is the power of the banks and the clearinghouses to recognize only such paper as they may agree to recognize. They will then fix the money of commerce." On Wednesday \$1000 Memphis gas stock sold at par; \$3000 Memphis City fire insurance stock is offering at 55, it brought 53½ last November, and since that time a 5 per cent. dividend has
